CARBON, ALBERTA, THURSDAY, JANUARY 8, 1931

\$2.00 A YEAR IN ADVANCE

CURLING STARTED HERE ON MONDAY

At last curling is under way in Carbon and although the weather has been fairly warm and the ice soft, it is expected that conditions will improve and that the curlers will be favored with good ice for the season. There are only eight rinks this year and with two sheets of ice each rink will curl every other night. The following are the completed rinks, the first named being the skip.

A. Reid Jr., M. Skerry, F. Emery and J. James. A. F. McKibbin, H. Jealous, W. Edwards and J. Connolly. R. J. Fairbairn, J. M. MacDonald, Alex Poxon and J. Jones. L. Poxon, P. Edwards, J. Tatterton, C. Moorehouse, Wm. McNichol, W. Smith, E. Rouleau and E. Sellens. G. F. McGregor, R. C. Barr, J. Atkinson and H. Edwards. J. J. Greenan, S. Carney, Jim Smith and F. Barker. S. F. Torrance, F. Bessant, J. Spence and Bruce Ramsay.

The President-Vice-president competition was run off the first of the week and the result was a win for the vice-president's side. The losers will pay for the supper to be held in the Carbon Hotel on Friday night at 8 p.m.

"GIVE AND TAKE" TO BE SHOWN AT THEATRE THIS WEEK

Jean Hersholt and George Sidney, two of the greatest character actors on the screen today, are well teamed in the Universal comedy drama, "Give and Take," which comes to the Carbon

CARBON THEATRE TO HAVE TALKIES EVERY FRIDAY

Commencing with the week of January 19th, the Carbon Theatre will show a Talkie film in the Farmers Exchange hall every Friday evening. This will be the first appearance of the "Talkies" in Carbon and patrons of the Carbon Theatre in the past will now be assured of the very best in the Talkie films in future.

Theatre on Friday and Saturday of this week.

The story deals with John Bauer, owner of a fruit canning factory, who waits with eagerness his son's return from college so as to make him a member of the firm. Young Jack arrives in due time and tries to install a system giving the workers a share in the profits of the factory. He calls it the "Give and Take" plan.

Albert Kruger, life-long friend of Bauer, Senior, and young Jack, together install the new system to the utter disgust of the Senior Bauer and his secretary, Marion Kruger, daughter of Albert.

The new regime includes singing hours for the employees and other innovations. There is a "Constitution" which gives titles to the various employees under the new system. When the time comes to share the debts of the factory, trouble arises.

Jean Hersholt, as the manager of the factory, as always, gives a perfect characterization. George Sidney has a new set of laughs for each turn of the reel. Sharon Lynn and George Lewis are extremely well cast as the young people who had been engaged to be married until they disagree over the best method of running a factory.

Hockey Notes

Carbon Wins from Ghost Pine

The Ghost Pine senior hockey team invaded the local skating rink on Saturday night of last week and clashed with the local team. A good crowd of spectators witnessed a fast and interesting game of hockey between the two teams and the game was clean with few penalties handed out during the 60 minutes of play. When the final gong sounded Carbon was victorious with a score of 2-0.

The following was Carbon's line-up: Goal, Leo Halstead; Defence, Bruce Ramsay and Alex Poxon; Forwards, S. Hay, Wilfred Poxon, E. Rouleau, J. Jones, J. Spence, and H. Edwards. Sandy Smith of Three Hills made an efficient referee.

Carbon Wins From Acme

The Acme senior team took their turn with the local boys on Sunday afternoon and this game ended with a greater score than any that the local boys have played so far this year and in the end Carbon won by a score of 9-6. This was the first game that Carbon has played with Acme for a number of years and it is anticipated that when these two teams meet again, an exciting game will result.

The Carbon team had a little different line-up on Sunday, as follows: Goal, Leo Halstead; Defence, A. Poxon, Hugh MacDonald and Bruce Ramsay; Forwards, S. Hay, W. Poxon, E. Rouleau, J. Jones, J. Spence, H. Edwards, G. Ramsay and Cyril Oliphant.

George Wise acted as referee for this game.

Junior Game Between Acme & Carbon

The Acme Junior team played at Carbon on Friday afternoon and were defeated 6-1, the Carbon boys proving too strong for the Acme boys. We understand that the Acme boys have since strengthened their team and that a return game will be played shortly.

Beiseker to Play Double-header Friday

The Beiseker hockey boys are coming to Carbon on Friday night with two teams, a junior and a senior, to try their skill with the local boys. The first game will be the junior game at 6:30 p.m. sharp, and the senior game will follow at 8:00 p.m. sharp. It might be in order to mention that last spring the Beiseker boys trimmed Carbon 8-1 and the local team will be out to redeem themselves on this occasion. The game should prove to be one of the best of the season.

THEIR EXCELLENCIES LEAVE CANADA ON JANUARY 16

It was announced at Rideau Hall that Lord Willingdon and his suite will leave Ottawa at noon on January 14, for Saint John N.B., whence they will sail on the Montclare on January 16. Their Excellencies will stop at Quebec en route to Saint John.

Mr. and Mrs. E. C. Miville, Capt. Streetfield, A.D.C. and Lieut. D. H. Fuller, A.D.C. will accompany the party.

Pending the arrival of the new governor-general, Chief Justice Anglin will be made administrator of the government.

FARMER MAKES SURE THAT BANKS GET WHEAT

From Edmonton comes a "Short story" regarding a banker, an elevator and a grain grower residing in a small town close to the northern city, all of whom have a vivid conception of the force of a chattel mortgage.

It appears that the banker had a mortgage on the farmer's wheat with the result that all elevators were notified that the bank wanted the cheque for any grain sold and delivered to them.

Recently the farmer loaded up a part of his 1930 harvest and went to town with the hopes of being able to receive enough cash to pay for the Christmas groceries and possibly leave enough over for a few presents to cheer up the household on December 25.

The elevator at which he called stated that it would take his wheat but that the cheque would have to go to the bank. The farmer went on to another elevator. Again he was told that the proceeds must go to the bank. The farmer tried a third elevator with the same result.

With fine vocabulary, the irate farmer swore the bank would get the wheat all right. Galloping his team up the main street he backed his wagon up to the bank, which was then closed, smashed in the window of the manager's office with his scoop and shovelled the entire load of wheat in among the chairs, desk, files of papers and sheafs of notes, while the citizens of the village went into paroxysms of laughter.

The banker is reported to be thanking his lucky stars he did not have a mortgage on the farmer's cattle.

MORE OYSTERS WITH PEARLS

A short time ago a passenger on the Canadian National Railways' train out of Edmonton, discovered a valuable pearl in an order of oysters, which was served to him in the dining car, with the result that every oyster on the train was ordered and eagerly searched by other passengers with the expectation that possibly they also would get a lucky break.

To complete the chain, a retired Canadian National Employee recently found a pearl of exceptionally large size and beautiful lustre in an oyster on the train running between Toronto and Montreal. If this keeps up, it is expected that there will be a large increase in the number of oyster eaters on Canadian National diners, with speculative motives.

WALSH MAY BE LIEUT.-GOVERNOR

Appointment of Mr. Justice Walsh, of the supreme Court of Alberta, as Successor to his honor, Dr. William Egbert, Lieutenant-Governor of Alberta, who will retire in the near future, has been rumored lately.

Mr. Justice Walsh was one of the first lawyers to practice in the North-West Territories, and has sat on the bench of the Supreme Court of Alberta for the past 20 years. He is now 74 years old and is due to retire from the bench when 75 years old.

Another name mentioned in connection with the appointment has been that of John Irwin, M.L.A. for Calgary, who was elected for a second term as a Conservative member of the Legislature in the recent provincial elections.

CLAYTON-BECKWITH

A very pretty wedding took place at the home of Mr. and Mrs. G. L. Beckwith of Lousana, on January 1, when their second daughter, Laura Linden, was united in marriage to Samuel Clayton, only son of Mr. and the late Mrs. James Clayton, of Carbon.

The bride looked charming in a princess gown of powder blue lace with jacket to match. She carried a bouquet of pink butterfly roses, and was given in marriage by her brother, Casper, and her elder sister, Elizabeth, acted as bridesmaid. The groom was supported by Fred McCracken of Carbon.

After the ceremony the party sat down to an informal wedding breakfast, when the three tier cake was cut by the bride.

The bride has been teaching school in Elnora for the past two and one-half years. Among the gifts received was a silver tea service and tray from the people of Elnora.

Rev. C. B. Oakley of Elnora performed the ceremony.

crease in the number of oyster eaters on Canadian National diners, with speculative motives.

Melody Mike Greets You

Canada is sold on "Melody Mike."

Every Monday night when you tune in on your radio this is the genial old soul who delights you and whose popularity across the Dominion is attested by the fact that more than 15,000 fan letters of praise and congratulation have been received in a month by the Canadian Pacific Radio department under whose auspices "Melody Mike's Music Shop" feature has been sent out over an all-

Canadian C. P. R. network. This huge fan mail is doubling and at the end of November 970 letters came in on one day. The opinion of radio fans is borne out by the views of radio station authorities—most difficult of men to convince—who state that in their considered opinion, this feature is with one exception the most popular radio offering on the air today. Remember too that artists, presentation, and radio outfit are all-Canadian.

The Fight For Peace

Living, as we do, in the fourth decade of the twentieth century of the Christian era, and more than twelve years after the close of the war to end all war, the huge armaments maintained by the more civilized countries of the world continue to be a menace to the future peace of the world, and to falsify the many professions of "a will to peace" voiced by the leading statesmen of the world.

Great as the inconsistency of all nations appears to be, the inconsistency, in fact the blatant hypocrisy, of Soviet Russia stands out over and above all other countries. Here is a republic, a people's government, founded as a result of a revolt against the militaristic government of the former Czars, preaching the doctrines of world brotherhood, yet maintaining and rapidly increasing the most powerful army in the world.

Recently one of the important illustrated papers in Berlin, Germany, presented pictorially the relative strengths of the armies of Europe and the extent of their war equipment. It reveals the fact that the present peace strength of the Russian armies is 1,200,000 men, or almost double that of the next largest European army, that of France with 650,700 men, Italy coming third with about the same number, 638,300.

Russia, with its 1,200,000 able-bodied men withdrawn from productive occupations, is, at the same time, short of man-power to carry out its ambitious five-year programme, and we find Pravda, the official organ of the Communist Party, urging the recruiting of women as one means of solving the Soviet Union's growing labor problem. More than 2,000,000 additional workers are needed in 1931, says this official Government organ, to carry out huge projects of the five-year plan. After pointing out that six million women are engaged in household duties in Russian cities, it advocates securing the required labor from this source, while 1,200,000 men are kept "marking time" in a so-called peace-time army. What a travesty, what a tragedy! What denial of all the principles for which the Communist party throughout the world, with its denunciations of capitalist governments supported by armies, professes to stand.

And how is this huge Russian army equipped? With 600 heavy guns, or 200 more than Great Britain; 2,400 light guns, or more than any other country in the world, and 700 more than Great Britain; 23,000 machine guns, or 10,000 more than Great Britain; with 250 tanks, compared with 200 in Great Britain; and 1,400 war aeroplanes, or only 147 less than Great Britain, with its world-encircling empire to patrol and defend.

And whom has Russia to fear? Her nearest and most powerful neighbor, Germany, was disarmed by the Treaty of Versailles, left with an army of only 100,000 men for the maintenance of peace at home, permitted to have no heavy guns, only 288 light guns, less than 2,000 machine guns, no war aeroplanes, no tanks.

And because Communist Russia maintains, and is increasing and strengthening its huge army, and conducts a persistent propaganda in other countries against all forms of established government except their own, and continues to preach a world revolution, the other nations of Europe feel they, too, must remain armed to the teeth. The result is that Europe remains an armed camp.

The Great War taught us that, removed though Canada may be from the Old World nations, we cannot be indifferent to the situation existing. Should the scourge of war again sweep Europe, we, too, would be the sufferers. It cannot be otherwise.

The greatest present guarantee of the maintenance of peace is to be found in the League of Nations. It has prevented more than one outbreak since 1918. The real strength of the League of Nations is to be found in another league, the British Commonwealth of Nations. They are the backbone of the greater world league.

Maintenance of the League of Nations costs Canada approximately a quarter of a million dollars a year. Some people think it costs too much, but what is a quarter of a million annually for ten million people in comparison to the annual cost to them resulting from the Great War in national debt, pensions to disabled men, soldiers' hospitalization, settlement schemes, and sundry other expenses running into millions of dollars annually?

Every Canadian, therefore, should be an enthusiastic supporter of the League of Nations. No vote of money by Parliament should be more heartily approved than the vote to maintain the League. Not only so, but every Canadian should be a booster for the League, and should exert his or her personal influence to the end that Canada will always be found to be one of the staunchest upholders of the League of Nations at all times.

Died From Exposure

Coroner's Jury Brings In Verdict In Connection With Death Of Capt. Burke

Capt. E. J. A. Burke died from starvation and exposure according to a verdict returned by a coroner's jury at White Horse, Yukon. Burke, with two companions, Emil Kading and Bob Marten, disappeared in October while flying in the Liard River district. They began to mush towards civilization, but Burke collapsed and died November 20. His two companions were finally rescued and brought to White Horse by Pilot E. L. Wasson, and Joe Walsh, a prospector, on December 10.

To its finding the coroner's jury added a rider recommending that in future planes in northern British Columbia should be equipped with sufficient food in concentrated form to last for a reasonable period of time, a rifle and 50 rounds of ammunition, and snowshoes for each member of the plane crew. The jury also recommended that pilots be instructed in woodcraft.

Danger from Colds

Every woman beyond middle age should realize that a majority of the troubles she has to fear have their origin in what are known as common colds. Each attack lowers her vitality and reduces resistance to disease. At this season of the year every woman should see that her blood is toned up to meet the rigors of the climate and especially that strength should be restored after any cold, however slight. For this Dr. Williams' Pink Pills are a reliable tonic.

These Pills are not a mere stimulant giving temporary relief. They build up the body by creating that rich red blood which imparts the glow of health; steadies the nerves, improves the appetite and digestion and make the users capable of withstanding the rigors of our Fall and Winter months. They are sold by medicine dealers or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

A Sinister Date

October Sixth Has Prominent Place In British Politics

One of the most sinister dates in modern politics is October 6th. Have you ever seen the list? On October 6th, 1881, Gladstone denounced Parnell, and on October 6th, 1891, Parnell died. On October 6th, 1896, Rosebery retired from the leadership of the Liberal party, and on October 6th, 1909, he resigned the presidency of the Liberal League. On October 6th, 1891, W. H. Smith died while leading the House of Commons, and on October 6th, 1903, Joseph Chamberlain opened his disastrous tariff reform campaign with his Glasgow speech.

Persian Balm creates and preserves lovely and youthful complexions. Tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Swiftly absorbed by the tissues, making the skin wonderfully soft-textured. Unrivalled as an aid to feminine elegance. Delightful to use. Imparts additional charm to the daintiest of women. Persian Balm is the one toilet requisite for the exacting woman. Peerless as a beautifier.

Met the King and Queen

Granny Peters Never Thought She'd Live To See the Day

Granny Peters has lived all her 77 years in the mean streets of London's east end—and her cup runneth over. For she has met the King and Queen, had a cup of tea with the Queen and Princess Mary, shaken hands with Princess Beatrice and now she has shaken hands and had a talk with the Prince of Wales.

The Prince, visiting the settlement, saw a movie of Granny being presented to the Queen. "I'd like to meet her," he said.

"I never thought I'd live to see this day," wept Granny.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Users Of Canadian Lime

The principal consumers of Canadian lime are the chemical and metallurgical industries, pulp mills, and the building trades.

Do You Like Shortbread!

1 cup Purity Flour Mix all ingredients very carefully. Spread evenly in pan and prick with fork. Bake in moderate oven (375°) for 20 minutes, or to golden brown. Cut in squares and allow to cool while in pan. Brown sugar may be used in place of icing sugar. Be sure it is Purity Flour you use.

The rich, hard wheat flour for all your baking.

Western Canada Flour Mills Co., Limited, Toronto, Winnipeg, Calgary.

Look for our Company's name on the Purity Flour sack. It is your guarantee of quality from a responsible milling concern.

best for Cakes, Pies, Buns, Bread

For two pie shells: 3 cups Purity Flour, 1 cup lard, 1/4 tsp salt, 1 cup cold water. (For richer flavor use 1/2 butter and 1/4 lard).

METHOD: Mix the flour and salt cutting in half the shortening until the mixture is like fine meal, gradually adding exact quantity of water but not a drop more. Turn out on board very lightly sprinkled with Purity Flour, roll about one quarter inch thick. Then spread balance of shortening over dough, fold over three times and roll again to required thickness. Bake in hot oven (375°). 307

Many Unclaimed Medals

Department Of National Defence Has Large Number Still On Hand

The number of medals in the custody of the records branch of the Department of National Defence is gradually diminishing, but the number on hand is still large. The present addresses of many of the men who served in the Great War and who are entitled to the medals are unknown. Of the 66,104 "1914-15 stars" received for distribution, 1,660 still await claimants. Over 200 were issued in the past year.

A total of 415,645 British war medals were distributed for members of the Canadian expeditionary forces, and of these 55,932 are still unissued.

The records branch has found it impossible up to the present to locate 33,224 men entitled to the victory medal, out of a total of 340,245 that were earned. Of these medals, 5,861 were disposed of during the last twelve months.

Moose Jaw Postal Revenues

Revenue from the post office in Moose Jaw for the fiscal year ended March 31st, 1930, reached a total of \$134,986, according to the Postmaster-General's annual report, and the "Optimeter" notes that in the list of earnings of all post offices in the Dominion, the Moose Jaw office takes 19th place.

North American Gold

Ten years ago the gold output of the United States was three times as great as that of Canada. Today chiefly owing to the increase in Canada, the two countries produce almost equal quantities.

Ice From the Tropics

Product Of Carbon Dioxide Found In Oil Fields Of Mexico

And now they're importing ice from the tropics.

It is a product of carbon dioxide gas found in wells of the Tampico, Mexico, oil fields, flowing to the surface at a pressure of 1,000 pounds to the square inch. The information is contained in a bulletin of the United States navy department's bureau of engineering.

A New York concern has erected a factory which solidifies the gas into "sub-zero" ice. It has a capacity of 40,000 pounds a day. Vessels with insulated chambers of cork board a foot-thick will bring the ice to the United States.

The oldest Egyptian mummies are almost 5,000 years old.

Magnesia Best for Your Indigestion

Most people who suffer, either occasionally or chronically from gas, sourness and indigestion, have now discontinued disagreeable diets, stomach tonics, medicines and artificial digestants, and instead, take a teaspoonful or four tablets of Bisurated Magnesia after meals with the result that their stomach no longer troubles them. They are able to eat as they please and they enjoy much better health. Those who use Bisurated Magnesia never dread the approach of meal time because they know this wonderful anti-acid and food corrective, which can be obtained from any good drug store, will instantly neutralize the stomach acidity, sweeten the stomach, prevent food fermentation, and make digestion easy. Try this plan yourself, but be certain to get Bisurated Magnesia especially prepared for stomach use.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Retires From Board

Col. Vien, K.C., Severs Connection With Board Of Railway Commissioners

Col. Thomas Vien, K.C., deputy chief commissioner of the board of railway commissioners for Canada, announced his retirement from the government service. He plans to resume his law practice in Montreal.

Col. Vien was active in politics before he was appointed to the board of railway commissioners five years ago. He represented the constituency of Lothiniere, Quebec, as Liberal member for several years. He was elected first for that riding in 1917, and was re-elected in 1921.

Good judgment is the basis of all success.

Proposed Aerial Transport Line Between Great Britain and Canada By Way Of Northern Route

In an article written for the Toronto Globe, Major-Gen. James H. MacBrien, president of the Aviation League of Canada, explains the proposed aerial line of transport between Great Britain and Canada by way of Greenland.

This potential air line, he said, now being surveyed by the Watkins Greenland expedition, emphasizes the geographical position which will make Canada one of the most important units in Imperial and world air transport. Examination of a world globe shows that the shortest route from Great Britain to Eastern Asia is across Northern Canada; the shortest route from the United States to Northern and Western Europe is over the central and eastern part of Canada; and, the shortest route from the United States to Asia and to the Far East is over the western part of Canada.

"Ordinarily Winnipeg, in the heart of Canada, is a 12-days' journey from London; but in a few years the journey will be done in two and a half days. The 5,000 miles that now have to be covered will be reduced to 3,500, and of these not more than 1,400 will be over water."

There is nothing in this prediction greatly to surprise Western Canada, where flights are regularly made from the banks of the Red River into the Arctic, to Chesterfield, or down the Mackenzie River to Ak-lavik, which is eight degrees farther into the Arctic than any point on the proposed air line from Britain to Canada. Before such a route can come into regular use two or three years will have to be spent in preparation; but the first flight from London to Winnipeg to be made by way of Iceland and Greenland by Baffin Land and Hudson Bay, should be flown next August if all goes well with the Watkins' expedition.

Three routes have been considered for the Canada-Britain line. One is by the Azores and Bermuda, which involves long stretches of flight over water; the other, by way of Newfoundland to Ireland, is short and direct, but involves an even longer water flight and worse climatic conditions.

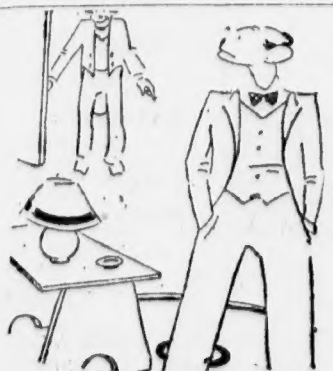

"As safety is the first consideration in every sound commercial air enterprise, only the northern route remains. This is by way of Orkneys, Baffin Land, thence down the west coast of Hudson Bay to Winnipeg.

"It is a flight of jumps, none longer than 470 miles over water and for four-fifths of the way none unreasonably out of reach of emergency landing harbors."

Cheviot Sheep For West

Carload To Be Shipped To University Of Saskatchewan From Quebec Province

A carload of Cheviot sheep has been shipped from MacDonald College to the University of Saskatchewan for use in tests to determine the most satisfactory types that may be bred in Western Canada. There were only a few Cheviots in Quebec prior to their real introduction into the province by MacDonald College, (Agricultural Faculty of McGill University). The carload in question was selected from various parts of Quebec Province by the college authorities.

"James, my car is getting wet in the street."
"No, sir, John is holding an umbrella over it."—Buen Humor, Madrid.

Russian Furs Flooding Market

Canadian Furriers' Guild See Menace To Canadian Industry

The menace of flooding the markets of Canada with Russian furs produced under the Soviet's "five year plan" and under conditions of "virtual slavery," has prompted the Canadian Furriers' Guild to make representations to the Minister of National Revenue, Hon. E. B. Ryckman, looking towards measures designed to forestall the threat, according to F. D. Burkholder of Ottawa, president of the guild.

The furriers are asking for the imposition of a tariff on raw furs with certain preferential clauses. So far there has not been much direct swamping of Canada with the Soviet articles, although a large volume is entering this country through the United States, Mr. Burkholder says.

The trade in Canada is being affected also by the actions of certain British furriers who, lending themselves as agents in London for those materials dumped into England, are re-exporting them to this country at a price with which the Canadian trade cannot compete.

"There is a definite design on the part of the Soviets to destroy the fur industry throughout the world," Mr. Burkholder said recently. "It is an established fact that in the London and European markets the Soviets are offering raw furs at a price considerably lower than that of Canadian furs, while at the same time they are selling manufactured and semi-manufactured articles at a price that is even lower than the raw material. That is an impossible situation. In Russia, the fur trade, like all other industries, is nationalized, while we in Canada have to provide for the trapper, the collector and all the other agencies necessary to the maintenance of the industry. In Russia the furs are, in the first place, the property of the government; they are secured under conditions of virtual slavery; the collectors simply go through the country gathering them in, the initial costs being practically nothing.

"The Soviets have established factories which copy European and North American styles, and they are seeking to control not only the market for pelts, but that also for manufactured goods. The competition is not fair competition, and it is against that we are protesting."

Freedom Of Speech

Britain Believes the Way To Kill Foolish Ideas Is To Permit Freedom Of Speech

In Hyde Park, London, England, not far from the royal palace in which King George V. reigns, is the home of free speech. There in a space set aside and provided with police protection, anyone may mount a soapbox and spout to his heart's content about anything that pleases—or, more frequently, displeases him.

As about a score of speakers raved about a score of isms, squads of policemen came charging by. The speakers, and the crowds, jumping to the conclusion their ancient rights were being assailed, started after the police and there was a free-for-all.

After the riot had calmed down, the police explained, very patiently, that, far from desiring to interrupt the speakers, they had been engaged in chasing away hoodlums who threatened to interfere with the speaking.

The Britishers realize that the way to kill a foolish idea is to lay it out in the sunshine of public opinion and let it shrivel.—Vancouver Sun.

Poultry Shipment To Hungary

A poultry shipment was made the other day from the Canadian Pacific Supply Farm at Strathmore to Hungary, the purchaser being Senator Hugo of Budapest, who is now touring Canada. The shipment consisted of one cockerel and two pullets each of Rhode Island Reds and Barred Rocks.

A battleship takes on its food supplies, to the extent of about 100 tons, once a month.

Document Well Guarded

Montreal Church Vaults Hold Birth Certificate Of First White Child Born There

A yellowed document reposing in the vaults of Notre Dame church celebrated its 282nd anniversary on November 24 last. It is the birth and baptismal certificate of Barbe Lemounier, first white child to be born in the fort that grew to be Montreal.

Written in Latin, in behalf of one of the Jesuit missionaries whose order was serving the settlement in 1648, the document is so precious from the civil and historical viewpoint that the Quebec government has had a facsimile made.

The register in which the entry is made is a special one kept by the Jesuits between 1642 and 1657, Mr. Massicottee explained. There is a sprinkling of entries before that of the first white child; they cover the births and baptisms of children of converted Indians. The Jesuits kept their register in Latin until the year when the Sulpician Order came here, founded a parish and started maintenance of a church register in French.

The little girl was born in the fort, which was located below the Riviere St. Pierre, running roughly on a line of the Common street of today and westward toward Pointe a Callieres, now Point St. Charles.

(By Eva A. Tingey.)

CHARMING DAY WEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Simple becoming lines, easy to slip into, quick and fascinating to make.

Here you have today's model of rust red woollen tweed mixture. A suede belt marks the normal waistline and emphasizes the simulated bolero bodice.

The grouped plaits at the front of the skirt provide a smart flare and still retain the slim line of the silhouette.

It's such a comfortable dress for all-day wear.

Cricket green wool jersey with black patent leather belt is snappy.

Forest green canton crepe with self-fabric belt is very smart.

This pattern may be obtained in sizes 16 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Policy Of Ruthless Repression In India Would Destroy All Hope Of A Successful Issue

Grain Deficient In Mineral Salts

Should Be Added To Ready Mixed Feed For Hens

The bulk of the hen's ration is composed of grain products, practically all of which are deficient in some of the mineral salts.

In earlier times when a hen laid only one or two clutches of eggs in a year and was running out on a free range, there was no need for giving thought to the mineral question. During the months between nesting times, she was able to assimilate enough mineral matter to maintain a proper mineral balance.

Today she is quite often cheated of the free range and in addition expected to lay practically ten times as many eggs. It can readily be seen that it is necessary to supply certain minerals in the ration.

Before adding a mineral mixture or mineral feed to the ration, read the manufacturer's instructions. Aside from oyster shells, he may have taken care of the mineral question. Adding further mineral feed might cause a surplus which would be detrimental to the birds and at the same time increase the cost of the ration.

Egg Crates Should Be Well Seasoned

Or Peculiar Mold May Develop On Egg Shells

Recently a peculiar mold which develops on egg shells during shipment and in cold storage has caused some heavy losses to the handlers of cold storage eggs. As nearly as can be learned, it seems that this mold is caused by using crates made of unseasoned or poorly seasoned wood. This spot mold first appears on the outside of the egg shell. It leaves the egg unsightly and reduces its market value. Within a short time it will penetrate the shell, spreading through the interior surface and giving the egg a moldy flavor. It can be eliminated by using only well-seasoned egg crates.

Canadian Game Resources

Abundance Of Wild Life In Vast Wooded and Unsettled Areas

Notwithstanding the fact that serious inroads have been made on many species of game native to North America through the advance of settlement and development, there still remains in the vast wooded and unsettled portions of Canada an abundance of wild life. Thanks to wise legislative measures and strict enforcement of laws, these valuable resources have been protected and conserved with the result that game is well distributed throughout practically every province from the Atlantic to the Pacific.

Dairies In Merger

Amalgamated Creameries Of Canada To Operate In Ontario

A considerable number of dairies which have been operating in Ontario for at least 10 years have been included in a new company, Amalgamated Creameries of Canada, Limited, which has been granted a Federal charter.

British and Toronto interests are sponsoring the company and it is understood that Lord Teignmouth and Sir Reginald Butler will be the English representatives on the board of directors.

Caribou Herds Improving

Observations made by explorers and investigators of the Department of the Interior, Canada, over a considerable period indicate that a decided improvement has taken place in recent years in the condition of the caribou herds of Canada's northland. To the west in Yukon Territory and eastward almost to Hudson Bay the caribou reported in large numbers, in many cases having reappeared on their old migrational routes.

Casey (to foreman)—"I'm tired of carrying this hod. I want to push a wheelbarrow like Flynn does."

Foreman—"You push a wheelbarrow! What do you know about machinery."

"It would doubtless be possible to apply a far more ruthless policy of repression than anyone has yet suggested and, after a space of time to create a desert and call it peace," declared Lord Irwin, viceroy of India, in speaking at the annual dinner of the European Association at Calcutta, India, recently.

The man who has guided the helm of India since 1926 and who is soon to be replaced by Lord Willingdon, as viceroy, had a most attentive audience in the European association, which has been debating and is divided over methods of again bringing tranquility to the country.

Ruthless repression, continued Lord Irwin, would involve a rigid press censorship, compared to which the press ordinance had been almost negligible, also strict prohibition of all hostile expressions of opinion, suppression of the ordinary law of punishment over a wide field and other similar action.

"But, far from furthering the accomplishment of Britain's principal purpose, which is to lead India into self-government and retain her as an equal and contented member of the Empire, such action would aggravate the task and probably destroy the hope of a successful issue. The forces of what we call nationalism could not be dealt with on those lines."

Lord Irwin proceeded to denounce strenuously the tactics of the terrorists among the agitators and to declare that their actions would in no wise deflect the judgment of those responsible for framing the political structure of the future.

"If 'repression,'" continued the viceroy, "means determination on the part of the government to resist this menace to the irresponsible terrorist then the government will readily plead guilty to the charge."

Burning Pyrite Ores

New Process Makes Possible the Production Of Sulphur and Iron Ore In Canada

A new process for burning pyrite ores makes it possible for sulphur and iron ore to be produced in Canada on a commercial basis within a very short time. A description of this new process is contained in the current issue of the monthly letter of the Royal Bank of Canada.

The announcement in the Royal Bank's letter reads in part as follows:

"Among the recent developments in the Canadian mineral industries is one which holds promise of making substantial savings for the newsprint industry. It is hoped that by making use of a new process for burning Canadian pyrite ore, invented by Horace Freeman, of Shawinigan Falls, Quebec, that the newsprint industry can advantageously discontinue annual purchases of more than four and one-half million dollars worth of sulphur from abroad. In addition to direct savings to the newsprint and chemical industry, the by-product of this process, iron ore, would supply one-eighth of the total annual iron ore requirements of Ontario and Quebec.

When the Editor Writes

The editor of the Deepwater, Mo., World, reveals the secret of how he writes his editorials. He says he has the Bible to the right of him, a dictionary to the left of him, a typewriter in front of him, the wastebasket behind him, a chair under him and debts hanging over him.

"Don't bring that mortar up here, the extra weight may break the scaffolding."—Esquella, Barcelona.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as headaches, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word *genuine* in red.

WORLD HAPPENINGS BRIEFLY TOLD

The first month's operations in the Alberta government's new department of lands and mines yielded a total revenue of \$138,203.

Alarm over the continued depletion of the halibut resources of the north Pacific is expressed in the seventh report of the International Fisheries Commission.

Tax on gasoline brought the province of Ontario \$10,756,000 for the year ending October 31, last, Ontario department of highways' figures show.

The British museum announces discovery by its own and the University of Pennsylvania's expedition tour, of tombs of the great kings of the third dynasty, dating about 2400 B.C.

Cigarette consumption in Germany amounts to 32,800,000 yearly or about 500 to each inhabitant, while consumption of cigars reaches about 100 per person.

The recent visit of the Canadian trade delegation to the Orient was an immeasurable stimulant to trade relations, and should increase materially the imports and exports of China and Japan, according to G. I. Barr, general agent of the Canadian National Railways at Shanghai.

Among the Christmas gifts received by the Pope was an apparatus for recording dictation, by Thomas A. Edison. The pontiff experimented with the machine and sent a message of appreciation to the inventor, whom he also awarded the annual Papal medal in gold.

A trans-Atlantic telephone service is now available between the British Isles and all parts of Canada and Mexico. Heretofore the service extended only to the principal cities of those two countries. With the new equipment, the service will connect England to all parts of North America, including Cuba.

Canadian Petroleum

The chief petroleum producing areas in Canada are the Turner Valley field in Alberta; and the Petrolia and Enniskillen, the Oil Springs, and the Bothwell fields in southern Ontario.

She Couldn't Be Hoodwinked.

Miss E. Thomson, of Clapham, writes:—"I find that Carter's Little Liver Pills will do more to keep the complexion clear, and the skin free from blemishes, than all the face creams I have used. I found the real cause of face blemishes was usually due to liver and stomach troubles. My druggist recommended them as a specific for stimulating the liver and expelling the constipation poisons from the system." Take Carter's Little Liver Pills for sick headache and indigestion. All druggists 25¢ and 75¢ red pkgs.

W. N. U. 1871

SUNDAY SCHOOL LESSON

JANUARY 11

THE CHILDHOOD OF JESUS

Golden Text: "Jesus advanced in wisdom and stature, and in favor with God and men."—Luke 2:52.

Lesson: Luke, 2.

Devotional Reading: Isaiah 11:1-9.

Explanations and Comments

The Development Of Jesus, verses 40 and 52.—With these words compare and contrast the words by John the Baptist, the last words of our lesson last week. Like every one who has ever lived, Jesus began His life as a helpless infant, and like all normal children His powers developed gradually. As a child he grew physically and waxed (grew) strong; as He increased in wisdom and stature, so he grew spiritually, in favor with God and men. He had a gradual development until He attained a perfect manhood. "At each stage he was perfect for that stage, but the perfection of a child is inferior to the perfection of a man; it is the difference between innocence and perfect holiness."—Alfred Plummer.

"You know the Child Jesus at once by a halo round his brow. There was no glory in His real life to mark Him; we know this, for in after years his brethren thought his fame strange, and his townsmen rejected Him. Gradually and gently He woke to consciousness of life and its manifold meanings; gradually, and not at once, He embraced the sphere of human duties, and he woke to His earthly relationships one by one—the Son, the Brother, the Citizen, the Master. It is a very deep and beautiful and precious truth that the Eternal Son had a human and progressive childhood."

An Incident In the Childhood Of Jesus, verses 41-51.—Before the law, Joseph was the father of Jesus, and so Luke speaks of Joseph and Mary as the parents of Jesus, and notes that every year at the feast of the Passover they went to Jerusalem. Three times in this chapter Joseph is referred to as the father of Jesus. Dr. Garvie explains that Joseph is rightly called one of Jesus' parents, for in the home he provided for him, filled a parent's place and played a parent's part. To him God committed a trust and a task.

Women were not obliged to attend the Passover, but Mary accompanied Joseph on his annual pilgrimage, and when Jesus was twelve years old He went with them. As a "Son of the Law" He was subject to its obligations respecting feasts, fasts and the like.

Unknown to them, Jesus tarried behind in Jerusalem, and they went a day's journey toward Nazareth before they missed Him, for they supposed He was with kinsfolk or acquaintances in the same caravan.

Joseph and Mary spent part of one day hunting for their Boy in the caravan, another day in returning to Jerusalem, and on the third day they found Him in the temple. There were rooms off from the temple courts where teachers, famous Doctors of Law, were wont to meet their pupils, expound the law, and answer questions. Here, among the teachers and pupils, Joseph and Mary found the lost Boy, listening and asking questions which showed such understanding that all were amazed.

Mary, too, was astonished. Dr. A. B. Bruce suggests that her astonishment points to some contrast between a previous quiet, reserved manner of Jesus and His present bearing, which was a sudden flashing out of His inner life.

And It Pays

Highest advertising rate of any periodical in the country is charged by Ladies' Home Journal, which is \$9,500 for a full page. Woman's Home Companion rate is \$9,400; Delineator, \$9,200; Pictorial Review, and McCall's Magazine, \$8,800 each; Saturday Evening Post, which has largest circulation, \$8,000; Collier's, \$5,500; True Story, \$4,500; and Liberty, \$4,250.

Canadian Sheep Breeders' Association

Announcement Is Made Of Election Of Directors For 1931

Mr. R. W. Wade, secretary, of the Canadian Sheep Breeders' Association, announces that the mail ballot closed December 15th, 1930, electing directors for the Maritimes; Manitoba; Saskatchewan; Alberta and British Columbia, resulting as following: Maritime Provinces, A. S. McDonnell, Judique North, N.S.; Manitoba, George Gordon, Oak Lake, Man.; Saskatchewan, W. C. Heron, Huntton, Sask.; Alberta, John Wilson Sr., Innisfail, Alberta; Geo. R. Ball, No. 2, Strathcona, Alberta; British Columbia, Leonard Higginson, No. 2, Sardis, B.C.

The directors for Ontario and Quebec will be elected at the Provincial annual meetings of the Sheep Breeders' Associations taking place in February.

Canadian Method Approved

Doctors Of Europe Commend Idea Of Expert Anaesthetists

Canadian scientists are now recognized the world over and particularly in Europe, Dr. Pierre Z. Rheume, delegate of the Association des Medecins de Langue Francaise, from Montreal to the Paris convention of La Societe de Chirurgie Francaise, stated upon his return from Europe.

Important technical knowledge had resulted from the convention held in Paris, Dr. Rheume said, but the most pleasing and the most interesting was the commendation of the Canadian method of making use of specialist anaesthetists. The services of these experts are often used but the presence of nurses and internes is always considered as necessary in other countries of the world.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

Advice Of Indian Chief

"Stay awake to live long, is the advice of Chief White Horse Eagle, who claims to be 109 years old. He gave it to newspapermen, as he stopped in Chicago en route home to the Osage Indian territory in California, after a visit to Europe. "I only sleep four hours a day," he said. "People sleep too much; makes the blood sluggish."

B.C. Police Use Radio

System Covers Territory From Alaska To International Boundary

Getting your man by radio is the new method used effectively on the British Columbia coast by the provincial police. Operating one of the most complete and successful short-wave wireless chains on the continent, the British Columbia police radio system has handled 3,600 messages, containing 180,000 words, at its seven stations in the first year of operation. Many smart captures are credited to the system, which keeps the headquarters in Victoria in touch with its far flung posts from the Yukon to the international boundary.

Guard the Baby Against Colds

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

May Eliminate Deadly Gas

Inventor Claims New Device Will Remove Menace Of Carbon Monoxide

Virtual elimination of carbon monoxide is claimed from a carburetor invented by John Juhasz of New York.

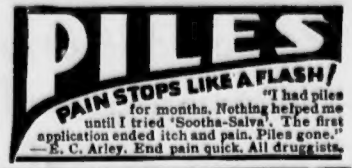

The device also permits the use of gasoline, kerosene or fuel oil in any automobile, motorboat or other internal combustion engines, it was reported by industrial physicists and engineers to whom it was submitted.

It has three carbureting chambers instead of one, with a separate nozzle in each, and five outlet holes in each nozzle.

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

To Solve Race Origin

British Scientist Goes To Africa To Discover People Of Dual Sex

Dr. Arthur Torrence, of London, England, a fellow of the Royal Society of Great Britain, has announced plans for an expedition in February to Africa, in which he said he hoped to determine the origin of the race.

"We will try to reach a people of dual sex we believe live near Lake Chad," he said. "My interest first was aroused when I encountered some of these peculiar people in Nigeria in 1924."

"I tried at that time to reach Lake Chad but was forced to turn back when advance members of my party were killed by a fierce tribe of desert nomads. I was halted again in 1926 by desert storms."

"It is my belief that the original human being was a person of dual sex. The influence of climate, the necessity of making a living and the need of looking after children, to my point of view, caused the division of the first human beings into two sexes. We hope to prove the long existence of these peoples by unearthing skeletons."

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Electric Oil may always be in every medicine chest ready for the emergencies that may always be anticipated.

Seeks Naturalization

Hamilton, Ont.—After residing in Canada for 75 years, John Henry Rount, a native of Germany, filed application for naturalization papers and Judge Thompson has favorably reported on his case to Ottawa officials. Rount came to Canada in 1855.

Heart and Nerves So Bad Was Unable To Sleep For Hours

Miss Theresa M. Ravary, Gallington, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially on retiring at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

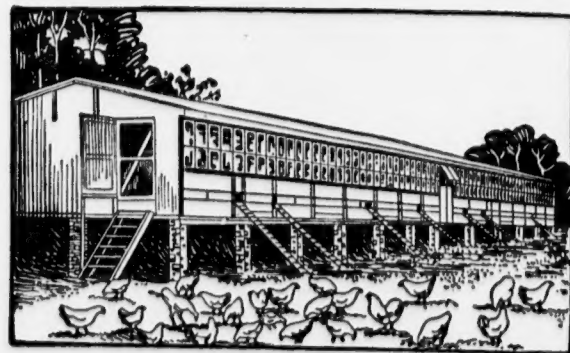

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN
YOUR LOSSES
BY INSTALLING
WINDOLITE

USE
WINDOLITE
IN
BROODER
HOUSES
LAYING PENS
DAIRY BARN
SUNROOMS
ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

BIG CORPORATION TO BE CREATED TO AID FARMERS

Regina, Sask.—Before an interested audience of fully 8,000 people here, Premier Bennett delivered a message of hope to the people of Western Canada. Mr. Bennett's address was mainly directed to the farmers of the prairies. As a westerner himself, he declared, he was keenly alive to their problems and was determined to solve them and at the same time promote the national interests of Canada as a whole.

He reviewed the activities of his government since assuming office in August, the steps taken to relieve unemployment, providing funds to speed up public works, the increased protection afforded the Canadian producer by the tariff revision, and the stand taken by the government at the Imperial Conference.

Financial difficulties of the farmers of Canada will be met by the creation of a private corporation, in which banks, transportation companies, industrial concerns, insurance and mortgage companies will be shareholders, said Mr. Bennett.

The primary object of the proposed Farm Finance Corporation is to assist farmers now engaged wholly or largely in the production of grain to launch out into mixed farming.

"In this regard," said Mr. Bennett, "the suggestion made a few weeks ago by Mr. E. W. Beatty, president of the Canadian Pacific Railway Company, is to be commended. A private organization having as shareholders the transportation companies, banks, industrial enterprises, insurance and mortgage corporations with a reasonable capital used as a revolving loan fund, will meet the necessities of the situation."

"A class of business will be transacted in which the banks cannot engage, and local supervision will ensure a minimum of risk. In the United States where the loan capital was \$9,000,000 the losses of a similar organization over a considerable period of time were but \$27,000."

The fact that the marketing of wheat at present prices would still leave many farmers in difficulties called for the attention of the government, said the premier. The government was therefore going to assist the provinces in providing relief. "No citizen of this country," he said, "must suffer for lack of food, clothing, shelter or fuel. I would not have the wheat growers think it is our desire or intention to grant them more favorable treatment than any other class in the community will receive. We do not offer them charity for they do not want charity. What we offer them is that measure of relief which the circumstances of the case so fully warrant."

While fully alive to the immediate difficulties, the Federal Government was also occupied in finding permanent markets for Canadian farm products. These efforts were directed along three lines, protection of the home market, extension of trade within the empire and revision of most favored nation treaties with foreign countries.

"Our minister of Japan, Hon. H. H. Marler," he said, "is, I hope, at this very hour on his way to China to discuss with the government of that great country the purchase of millions of bushels of our wheat. Nor will the government hesitate, if necessary, to assist by providing credit facilities and by other means in its power the establishment of so incalculably valuable a channel of trade."

With European countries speeding up their grain production it was obvious Canada would have to look to the Orient for a market. Canada had the goodwill of the Orient and the government was prepared to capitalize it.

With regard to his negotiations with France, Mr. Bennett said the existing duty on wheat was practically prohibitive. Since his meeting with the French government the government had been defeated; but despite this he had advice that France would guarantee to buy a substantial quantity of Canadian wheat.

Observatory For Toronto

One Of the Finest in the World To Be Erected in Eastern City

Toronto, Ont.—An astronomical observatory which will be one of the finest in the world, will be erected in Toronto in the near future, according to an announcement to the Canadian Press recently, by Prof. C. A. Chant, head of the Department of Astrology, University of Toronto. The observatory will be erected by Mrs. D. A. Dunlap, and her son, D. Moffat Dunlap, as a memorial to the late David Dunlap, who died six years ago, and will be known as the "David Dunlap Observatory."

The outstanding feature of the observatory will be a large reflecting telescope 74 inches in diameter. There is only one of greater aperture in the world, that on Mount Wilson, in California.

Canada's Farm Loans

Over Seven Million Distributed Within Two Years

Ottawa, Ont.—At the end of the present fiscal year on March 31 next, when the organization will have been functioning a little less than two years, the Canadian Farm Loan Board will have disbursed nearly \$7,000,000 in loans to farmers in six provinces of the Dominion, according to Dr. J. D. McLean, chairman of the board. Up to the present the average loan has been a little over \$2,000, and it is pointed out by Dr. McLean that back of the \$4,428,000 loaned up to the end of September, the government has securities in the form of lands and buildings valued at about \$16,000,000.

Buried in Northland

Atlin, B.C.—Capt. E. J. A. Burke was buried Monday, Dec. 29, in the little graveyard here where other pioneers of this northland sleep. Thus was written the last chapter of an epic of the north which for months had held the interest of thousands in the outside world. Burke died November 28 of exhaustion and starvation while lost with two companions in the Liard River district.

Russian Peasants Shot Down

Vilna, Poland.—Russian peasants who had crossed the Soviet border, said they and a number of others confined to a concentration camp awaiting deportation to Siberia, had been fired upon by Soviet soldiers when they attempted to escape. Forty of the prisoners were killed or wounded, they said. They had been sentenced to Siberia, they said, for resisting collectivization measures.

Six Children Die In Fire

St. Janvier, Que.—Six of the nine children of Henri Labelle suffered a terrible death amid the flames of an early morning fire that destroyed their home in this mountain village. An overheated kitchen stove stoked heavily for the night caused the blaze. Its glowing sheet iron sides set fire to the walls of the room while the Labelle family slept on the floor above.

Repays Old Debt

Malone, N.Y.—Thirty-seven years ago Walter W. Jarvis, 66, Malone florist, and David Knight, 65, were stranded on the western plains of Canada. Jarvis loaned his companion \$50 in order that the two could go to Montreal. They separated and recently Knight surprised Jarvis by walking into his florist shop and settling the debt.

Good Market For Ayrshires

Ottawa, Ont.—"The Royal Winter Fair still maintains its reputation as being not only the great show window for Ayrshire breeders but also as one of the best market places for Ayrshire cattle," says a report of the Canadian Ayrshire Breeders' Association, which gives a detailed synopsis of the successes achieved by this breed of cattle.

Ontario Town Holds Record

Hespeler, Ont.—This town upheld the tradition of 30 years without a mayoralty election. When nominations were called for this year, no opposition was forthcoming to L. E. Weaver's candidacy. All other offices were also filled by acclamation.

MAKES CONTRIBUTION TO SCIENCE

Dr. E. F. Burton, professor of physics at University of Toronto, who, in collaboration with Arnold Pitt, assistant demonstrator, has invented instrument for rapidly measuring quantity of moisture in human and other bodies.

Governor-General Taking New Position

Willingtons Leaving For India Via England On January 16

Ottawa, Ont.—Announcement that the Governor-General and Viscountess Willington will leave Canada for England, and subsequently for their new post in India, on January 16, has been made at government house. Their Excellencies will leave Ottawa by special train at noon on Wednesday, January 14, for Saint John, N.B., there to board the steamer "Montclair" for England. The journey to Saint John will be broken at Quebec where Their Excellencies spent several summers, and where they may attend a reception.

Accompanying Their Excellencies will be E. C. Mieville, governor-general's secretary, and Mrs. Mieville, Capt. R. J. Streatfield and Lieut. D. H. Fuller, R.N.

Mr. and Mrs. Mieville will go to India with Their Excellencies. As a consequence of his early departure for England, the last official function of the governor-general in Ottawa was the levee held in the senate chamber of the parliament buildings at noon on New Year's day.

Free Entertainment For Blind

Toronto, Ont.—Captain E. A. Baker, general secretary of the Canadian National Institute for the Blind, announced that arrangements have been made with the directors of the Famous Players' Canadian Corporation, Limited, to admit, free, blind people of Canada, together with sighted escorts, to all theatres operated by the corporation throughout Canada.

Harvesting In Alberta

Lethbridge, Alberta.—Something new in winter harvesting was reported December 30, from the thousand-acre Smith farm, five miles east of Lethbridge. Three combines were at work completing the harvesting which was started last August. The grain is perfectly dry and of fairly good color. The grain is averaging about 30 bushels per acre.

Shareholders To Meet

Emergency Meeting Of Shareholders Of Hudson's Bay Company To Be Held January 16

London, England.—An emergency meeting of the shareholders of the Hudson's Bay Company will be held on January 16, to consider the report of the special committee investigating affairs of the company for the last five months.

This report, according to the Daily Herald, will show little prospect of the company being able to earn dividends on either preference or common shares for some time to come.

The Financial Times draws attention to the proposal to segregate the Canadian stores from the company by formation of a Canadian company registered in Canada. The committee also suggested a cut in the number of the company's directors.

Attend Funeral Of Comrade

Members Of Crew Of R-100 Honor Granville Watts

London, England.—Members of the crew of the airship R-100 attended the funeral of Granville Watts, who had declined an offer to become a member of the crew of the R-101 on that vessel's ill-fated air voyage to India, which ended in disaster and the loss of 48 lives. Watts was not satisfied with the airship's condition. He was fatally injured in a motorcycle collision recently.

Watts had been on board the old R-32 when she crashed on Mount Ararat; on the R-32 when she broke her moorings in a storm and drifted for thirty hours; and on the R-100 when she crossed the Atlantic to visit Canada four months ago.

The Lowly Pedestrian

Has Equal Rights With Motorist On Highway, Says Judge

Montreal.—The humble pedestrian has found a champion in Chief Justice Greenshields, who, in rendering judgment in an automobile accident case, stated emphatically that a motor vehicle or vehicle of any kind had no superiority or right of way over "those unfortunate enough or perhaps I should say lucky enough, to use their feet as a method of locomotion. The pedestrian may at all times make use of the highway and every part thereof restrained by municipal legislation."

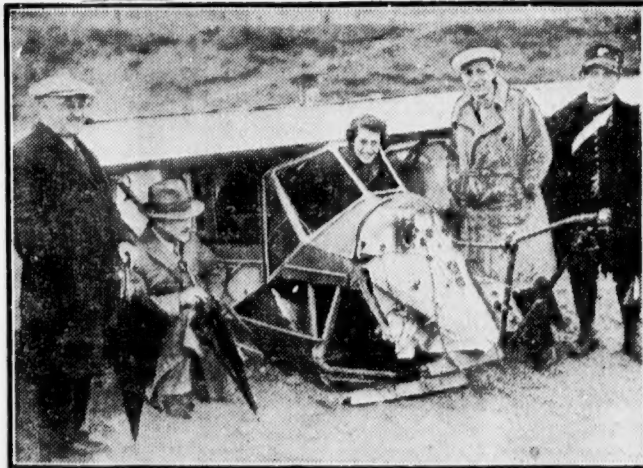

Four Corned Fight

Edmonton, Alberta.—Four candidates were nominated here for the Edmonton seat in the provincial legislature made vacant by the death of Colonel C. Y. Weaver. Those in the field are: Colonel F. C. Jamieson, Conservative; Captain J. C. Bowden, Liberal; Elmer Roper, Labor; Jan. Lakeman, Communist.

Report Is Denied

Montreal, Que.—Denial that the Canadian National Railways contemplates any immediate new construction work at its Port Arthur lake terminus was made by S. J. Hungerford vice-president, in charge of operation and construction.

HAD NARROW ESCAPE

Miss Winifred Spooner, British aviatrix, while attempting to break all previous records by flying from London, England, to Cape Town in four days, had a narrow escape from death when her plane crashed into the sea off Belmonte Calabro recently. Miss Spooner, who was unhurt, swam ashore, more than a mile, and obtained aid for her co-pilot, Captain Edwards, who was slightly injured. The plane was salvaged and towed into port at Belmonte Calabro. Photo shows Miss Spooner peering from wreckage after it was towed ashore.

PREPARE FOR STRUGGLE OVER FREIGHT RATES

Winnipeg, Man.—For a freight rates battle of the future, Manitoba farmers today are lining up a solid front. It will be an agrarian body that first opens fire at Ottawa for a suitable rail and ocean freight rate on the Hudson Bay route to world markets.

Prepared to struggle with a foe, designated as "big interests" in the east, United Farmers of Manitoba are seeking signatures of every farmer in the province to a petition which will be presented to the Dominion government.

The port of Churchill, in far north Manitoba, will mean a saving of "millions of dollars" to western farmers if the Crow's Nest basis of grain rates are secured, if ocean freight rates are placed "on a comparable basis with ocean rates at Montreal," and if a fair basis of rates on general merchandise, such as binder twine, window glass, and paint, from Churchill to all southern Manitoba points is secured, says the petition. But the U.F.M. recognizes opposition.

"Powerful financial interests, centred in the competitive ports of Montreal, Quebec, Saint John and Halifax" will oppose the west's demand for a low grain rate basis, equal to the Crow's Nest rates, the petition anticipates. Large shipping firms at the Atlantic seaboard will combat any move to effect low ocean rates from Churchill.

The farm body also will ask for a "substantial reduction in the present prohibitory marine insurance rate" from the Hudson Bay Port, of 5 per cent.—"which means approximately 5 cents per bushel on wheat." The present insurance rate would alone kill the successful operation of the route, so far as any financial benefit to Manitoba and Saskatchewan farmers is concerned, asserts the petition.

"Maintenance of this excessive marine insurance rate and the maintenance of high ocean rates from Churchill is the aim and object of powerful transportation, financial and manufacturing interests centred in eastern Canada—their determination being to arrange through-transportation rates on our export farm products and our import farm necessities, on such a high basis as will equal the present cost of transportation via the ports of Montreal, Saint John or Halifax."

Once the port of Churchill is opened, the petition declares, it will be "many years" before the freight rates are changed. Thus, farmers of the west must present their demands to Ottawa in good time.

"The fact that tidewater will never be nearer to Manitoba than it is at Churchill, is full of significance to us, and it is, therefore, exceedingly important that we join in this well directed effort to increase the prosperity and purchasing power of the producers of the prairie provinces," the farm unit's petition urges.

Baldwin's New Year's Wish

Hope That Labor Government May Come To Speedy and Unlamented End

London, England.—Rt. Hon. Stanley Baldwin's "best and most cheerful political New Year wish for 1931" is: "May the present government come to a speedy and unlamented end," he wrote recently in a 1931 message of greeting to the people of Great Britain.

In his message he outlined Conservative plans for remedying economic conditions with an emergency tariff for the protection of manufacturers, a guaranteed price and a guaranteed market for British wheat and a scheme for the development of Empire trade.

"When the general election comes," he wrote, "and I am of the opinion that it won't be long despite the Liberal plot to keep the Socialists in power, we shall make an immediate beginning on a policy to help the process of national recovery."

ARE YOU LOYAL?

(Salmon Arm Observer)

This year in particular there is need for buying at home. The suggestion may not please everyone any more than the fact that all our storekeepers do not advertise pleases us, but we are still loyal enough to urge our readers to buy from their local stores instead of sending their good money away.

These hard times call for consideration of every cent expended but there is one thing which can be depended upon and that is that you get value for your money when it is spent locally. Those of us who have been through this game can vouch for it.

If we all purchased our goods from distant places there would soon be no

Salmon Arm and without the business section there would be no residential area because the latter could not meet the taxes that would be required. Furthermore, no reasonable person would care to live in a town or district which had no stores. It is not difficult to pick out the towns in B. C. whose inhabitants are out-of-town shoppers. They have the hardest time to make any progress in civic affairs.

We would just remind our store friends also that they should invite the residents of this district to visit their stores and see what they would have to offer. The blame is not altogether the customer's if they shop elsewhere.

REASONS WHY YOU SHOULD BE A BOY SCOUT

1. Scouting fills a boy's spare time with healthy occupations in healthy company.
2. Scouting gives a boy character which is essential to success in any career.
3. Scouting is not a military movement. We are out to make good individual citizens, not a crowd of imitation soldiers.
5. Scouting makes a boy handy. His hobbies are useful at home as well as interesting to himself.
6. Scouting gives a boy a sense of honour and loyalty. He will not let you down or tell you a lie.
7. Scouting teaches a boy self reliance so that he can fend himself and help other people.
8. Scouting gives a boy health. Through open-air exercise and self-care, he gains a sound mind in a healthy body.
9. Scouting widens a boy's outlook, since its branches in every civilized country are in mutual touch with one another.
10. Scouting will make a man of your boy and the sort of a man you would wish him to be.

Here and There

(666)

Canada looms more important than ever in the trans-Pacific carrying trade, since the Empress of Japan sailed from Vancouver recently with a total of 998 passengers for Honolulu and the Far East, setting a record for the Canadian Pacific white Empresses for the year and amply justifying the company's expenditure of \$8,000,000 in a ship which is the largest and fastest on the Pacific.

Emergency work in the west on Canada's Pacific Railway construction this fall and winter represents expenditure of more than half a million dollars in alleviation of unemployment. The work is being undertaken in the provinces of Saskatchewan and Alberta. Similar relief in the East is seen in the fact that 550 former employees are now being taken on at the Angus Shops, Montreal, where they will work on repairs to passenger cars.

Bound on her 30,000-mile annual Canadian Pacific cruise around the world which will last four and a half months, the S.S. Empress of Australia sailed on the first lap of her voyage from New York December 2. She will touch at 81 ports and places in 24 countries during the trip and will be at sea 78 days and in port 59 days. She sailed with a capacity passenger list.

Patrons of the Royal York Hotel, Toronto, will enjoy the finest beef at the coming Christmas and New Year festivities possible to procure as a result of the purchase by the hotel management of 60 prize animals at the Royal Winter Fair held at Toronto recently.

A tablet has been erected at Windsor, N. S., by the Canadian Government commemorating the founding of King's College in 1789, the first university in Canada and the oldest in the British overseas dominions.

Total production of honey this year in Saskatchewan will be over 700,000 pounds, an increase of about 300,000 pounds over the output in 1929. Since 1927 the number of bee colonies in Saskatchewan has increased 213 per cent.

At the Ideal Homes Exhibition recently held in Edinburgh, Scotland, the Canadian exhibit was awarded the gold medal for general excellence. This award was made in the face of keen competition from more than 100 exhibitors from all parts of the British Empire.

A preliminary report on Canadian tobacco production shows the 1930 area at 41,391 acres and the production at 36,712,700 pounds, as compared with last year's area of 37,700 acres with an output of 29,786,000 pounds. In 1930 Ontario harvested 28,078,000 pounds from 32,170 acres; Quebec had 8,450,000 pounds from 9,000 acres and British Columbia 144,700 pounds from 221 acres.

Are You Satisfied With Your Business ?

MOST MERCHANTS ARE FINDING BUSINESS UNUSUALLY QUIET JUST NOW. SOME CONSIDER THAT A REASON FOR CUTTING DOWN THEIR ADVERTISING SPACE. JUST THE OPPOSITE SHOULD BE THE CASE.

A MERCHANT WHO BUILT UP ONE OF THE GREATEST MODERN DEPARTMENT STORES ONCE SAID: "WHEN TIMES ARE GOOD IT IS EASY TO SELL THE GOODS AND IT ISN'T NECESSARY TO ADVERTISE SO MUCH, BUT WHEN TIMES ARE DULL ONE HAS TO GO AFTER THE BUSINESS AND I MAKE A BIG INCREASE IN MY ADVERTISING."

IN HIS CASE RESULTS CERTAINLY PROVED HIS IDEA TO BE CORRECT. FOLLOW HIS EXAMPLE.

TELL THE PUBLIC EVERYTHING AND WATCH 'EM BUY

ADVERTISING PAYS. BUT—ONLY IN PROPORTION TO WHAT YOU TELL IN IT! THAT IS, YOU CAN'T EXPECT "WHALE" SIZE RESULTS FROM A "FLY" SIZE AD. FOLKS, IN READING YOUR MESSAGE, WANT TO KNOW ALL THERE IS TO KNOW THEY WANT EVERY FACT AND FIGURE YOU'VE GOT TO OFFER. BESIDES, IT STANDS TO REASON, A LARGE AD COMPELS MORE ATTENTION AND SELLS BETTER

New Chevrolet Bigger and Finer

**HANDSOME 1931 MODELS**

Here is what the new Chevrolet looks like at its first public showings now being held across Canada. There are nine body types, the five-window coupe at the upper left being an addition to the line. Below is the standard sedan which shows the large, roomy effect achieved by lengthening the wheelbase to 109 inches. Wire wheels are standard equipment. Upper right shows the changed front view, the higher radiator, the chrome-plate tie-bar which arches between the headlamps, and the new horn mounted below the left headlamp. Prices of the new Chevrolet are lower than those at which the 1930 models were introduced.

CHAPTER VIII.

"Well," said John Maxwell, as he regarded his wife across the tea cups that night at supper, "I've got one good deed chalked up to my credit. I've arranged to keep that boy out of the vampire's clutches for one day anyhow!"

Mary smiled, and with a practiced hand dropped three lumps of sugar into his tea.

"How'd you do it, Johnny?"

"I am forced to admit that the credit's not all mine. You remember Simeon Bartlett, don't you?"

"That dear old man who lunched here one day, and who's so devoted to Gay and Nick?"

John nodded, stirring his tea thoughtfully.

"They spent the first week of their honeymoon at his camp, you know. He thinks he owns them! Well, he blew in this morning unexpectedly—had some business with me; but after lunch he came back again. Walked in and closed the door—mopped his steaming brow, and remarked that he wanted to borrow my paying teller."

"For how long?"

"Just over Monday—the holiday. Gay and the babies are going back with him tomorrow for a visit. Glad of it. If ever a girl needed a change of—something—"

"I know all about Gay. I've been there this afternoon; but she didn't know that Nick was going with them. I think she was worrying at leaving him."

"Old Simeon saw that. He was going to hire Sam Hilton to take them over; but it occurred to him that if Nick could get off for Friday and Saturday, he could drive the car, and at the same time keep out of mischief."

"You don't mean, Johnny, that Mr. Bartlett said anything about the vampire?"

Mary's eyes opened so wide that her husband laughed.

"I doubt if he ever heard the word, my dear; but he knows the breed. However, Simeon was discreet. He merely hinted that though Nick had made some engagement with his new neighbors, he thought the matter could be arranged. And I said: 'It'll be arranged if I have to go back to the days of my youth and be paying teller myself while he's away.'"

"And what did Mr. Bartlett say to that?"

John smiled in reminiscence. "He merely grunted—at first. Then he said: 'Nick's a good boy, John Maxwell.'"

"Too good to spend a day in company with a pair of innocent blue eyes?" I asked; and he replied: 'Ain't I heard tell that opportunity makes the thief? They's times, John Maxwell, when it ain't a bad idea to remove the opportunity. I guess we understands each other, don't we?'"

"We do," said I. "The entire bank is at your disposal in such a cause."

"I ain't askin' for the bank," said Simeon. "All I want is your payin' teller."

W. N. U. 1871

Mary laughed, and commented: "He's an old dear; but I wonder how he—well, caught on so quickly. Gay's too loyal to have given him a hint, even if her fears were aroused, which I very much doubt."

"She wouldn't have to hint much, Mary. That old man is as shrewd as a hawk. The merest word would have set him thinking, and he always thinks to some purpose. Anyway, it will do Gay good to have a change. What did you think of her?"

Mary Maxwell removed a slice of bread from the electric toaster, buttered it temptingly and passed it to her husband before she said: "Gay looked tired, of course; but what young mother isn't tired at times? Whooping cough lasts forever, and both babies had it. She was busy packing, so I produced my thimble and told her to forget I was there except when she found something that needed a stitch. Her mending had piled up fearfully, poor child—but I vanquished everything before I left—even that pinned-up pocket! She said I was as good as a mother!"

"I don't doubt you were, my dear. Did Gay seem happy about going?"

"Almost. She said that Mr. Bartlett was like a breath of cool air; but she was homesick at leaving Nick. I'm glad he's going. It won't be so hard to say good-bye when she's once away."

"Did she mention the Hallidays?"

"Only casually, because she saw me calling there the other day. She spoke of how beautifully the woman sings. That came up when I mentioned the grand piano. I'm sorry she sings, Johnny. Nick's so fond of music."

"Do you know," said John Maxwell unexpectedly, "I believe we're all making 'much ado about nothing.' Nick was as happy as a colt let loose at the idea of going to State Line. I heard him tell Simeon that the Hallidays would probably be relieved that he couldn't go with them! Anyhow, Mary, the boy's not conceited, and that'll protect him to some extent. It hasn't yet occurred to him that Mrs. Halliday might take pleasure in his company."

But if Nick was obvious of the fact that Angela Halliday regarded him as one bright spot in what she was pleased to call "the provincialism of Bakersville," the lady's husband was not so blind. It was the next morning, that, quite without intention, he came upon her standing by the window, watching the departure of her neighbors. Gay was on the front seat of Sam Hilton's comfortable Packard; while Uncle Sim, surrounded by bags, boxes, and babies, brought up the rear. Mrs. Halliday started at her husband's step; then turning, remarked languidly: "The party is off."

"So I perceive."

Halliday moved nearer, and with his usual cynical expression, watched Nick stoop to lock the door, run down the path like a boy, and take the place beside his wife.

"Quite en famille," Halliday remarked.

Angela shrugged. Shrugs, which had once been an affectation with her, were now as natural as the breath of life.

"What an impossible old man," she said, referring to Uncle Sim.

"But a far from impossible young man," rejoined her husband. "Good-looking—well set-up—and not uninteresting. I advise you—"

She wheeled on him angrily.

"I'm sick and tired of your advice! I can't even look out my windows without your spying on me! I heard how stealthily you came in. You thought you'd catch me waving good-bye or something. You're the most jealous—"

He interrupted her with an unpleasant laugh.

"No, my dear, I'm not jealous. I got over that stage of the game years ago. But when I occasionally take enough interest in my wife to warn her—she flies into a tantrum. Some day, if you're not careful, that bobbed-haired freak you've got in the kitchen will overhear you."

"What if she does? I don't want your warnings."

"But I shall continue to give them." He crossed the room swiftly and closed the door. "We'll have this out right now. I bought this place to keep you out of mischief. I supposed there was no one here sufficiently sophisticated to appeal to you; but I might have known better. You'd find them anywhere. If I took you to a desert island some native would turn up and bask in the light of your innocent eyes. It would make no difference to

you if his skin were black, or white, or yellow, so long as he worshipped at your shrine. I—"

"How long are you going to stand there and insult me?" interrupted Angela, with ominous calm.

"Insult you? Well, perhaps I have. I apologize; and admit that so far your taste in victims has been—irreproachable."

It was her turn to laugh unpleasantly.

"Not always. Not when I married you."

Hardened cynic though he was, Halliday winced as he replied: "Possibly you are right; but at least, I was not 'yellow.' I think you'll admit that I've played the game. I stuck by you when you'd estranged me from the only friend I ever cared for. If he'd married you I'd have got you your freedom—somehow—but—"

"If you think the decision lay in his hands," she broke in furiously, "you are mistaken. I wouldn't have married him if he'd been the last man left in the world. If you hadn't been the most jealous sort of a jealous fool—"

He moved a step nearer, and she stopped.

"It's not customary then, for a man to feel disturbed when he finds his wife in the arms of one he had thought a friend?"

She made no answer, and he continued: "As for the Ashley affair—"

Save for two spots that were not nature's handiwork, her face went white.

"Stop! I sha'n't listen! If you say a word more I'll—I'll—"

She had covered her ears with her hands and was shaking queerly. Her husband looked at her, but not a line of emotion crossed his face.

Railways In the Air

Switzerland Building One To Go Higher Than Jungfrau Line

Switzerland can already boast that it possesses the highest railway in Europe—the Jungfrau line, which goes up 11,340 feet. But it isn't satisfied with this—a new railway connecting St. Moritz with the Plz Bernina is now to be built. It will attain an altitude of 13,390 feet. At present there are only six railways in the world which go higher than the Jungfrau line. When the Plz Bernina is built there will be only four railways in the world to beat it in altitude. The Peruvian Central Railway is the present holder of the world's record. At one point it reaches 15,865 feet—just thirty-one feet more than is attained by the runner-up, the Antofagasta (Chili) and Bolivia Railway at its highest point. But Switzerland holds a world's record in the matter of electrification that no other country can challenge. Counting lines of all gauges, Switzerland has electrified 4,834 kilometres of railway, or 88.1 per cent. of its total track.

Wonders Of Science

Remarkable Demonstration At Exhibition Of Scientific Organization

Peculiar radiations from butterfly wings and onion roots, the control of complicated machinery by shadows and sounds, explorations at distances of millions of light years, analysis and destruction of sounds and other findings of scientific work in the United States will be demonstrated at Cleveland.

The exhibit will be at Western Reserve University in conjunction with the sessions of the American Association for the Advancement of Science.

Hankow, China, plans to have one of the most up-to-date telephone systems in the world.

Compares World To Gigantic Soap Bubble

Famous British Scientist Says It Is Still Expanding

The universe in which we live was likened to a fragile soap bubble by Sir James Jeans, famous British scientist, in a lecture at London, England.

"It is easy to blow a soap bubble," he said, "but far less easy to keep it in existence more than a minute or two—after that it is apt suddenly to burst and disappear. I hope I shall not startle you too much if I say that it has been discovered quite recently that the universe is something like that. As soon as the universe came into existence it started swelling and must go on expanding."

If the calculations of many astronomers as to the speed of nebulae receding is correct, he said, the universe must be expanding—"I might almost say, exploding—at a really terrific rate."

"The material universe," he continued, "appears to be passing away like a tale that's told, dissolving into nothingness before the light of day."

Start Of Aviation Warfare

First Allied Aviator Reprimanded For Shooting At Enemy

The first allied aviator to shoot at a German flier was severely reprimanded by a British general. Captain H. Weir Cook, World War aviator and director of the Curtiss-Wright flying field at Indianapolis said:

"Airplanes were used only for observation purposes at first, and when enemy fliers passed each other they waved their hands or made signs to indicate the war wasn't a personal matter with them," Captain Cook said.

"One of the British aviators took his revolver along with him on a flight one day and took a pot-shot at a German. He was called on the carpet by a general and warned that such unsportsmanlike conduct would not be tolerated."

"Other allied aviators took guns along with them, however, and finally one of them killed a German with a shotgun. That started aviation warfare."

Here's Hoping

Bruce Barton, advertising man, cites a theory that depressions usually last eighteen months, a period otherwise measured by the average man's possession of two suits of clothes. When both pairs of pants wear out hard times end. Here's hoping there are not too many two-pants suits in circulation!

LOSE FAT THIS WAY

No matter how fat you are or how much you hate to get out and walk a couple of miles—

If you will take half a teaspoon of Kruschen Salts in a glass of hot water every morning for 30 days—

You will feel so good—so energetic, and the urge for activity will be so great that you will immensely enjoy a daily walk of several miles—and lose fat.

Why will Kruschen Salts make this great change for the better in me—it is natural for you to ask.

Because Kruschen is a blend of the six vitalizing salts Nature says your body must have to keep every organ, gland and nerve in the body buoyantly healthy.

While you are losing fat you will be gaining in energy—in endurance—in ambition. Your skin will grow clearer, and your eyes will sparkle with the good health that Kruschen brings. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and active recreation and you'll sleep like a top. You'll lose fat, and probably live years longer.

Little Helps For This Week

"The poor always ye have with you."—John xii. 8.

Our Lord and Master When He departed left us in His will As our best legacy on earth, the poor: These we have always with us; had we not, Our hearts would grow as hard as are the stones.

The poor are always with us. The wayfarers come to us continually, and they do not come by chance. God sends them. And as they come, with their white faces and their poor, scuffling feet, they are our judges. Not merely by whether we give, but by how we give, and by what we give, they judge us. Thank God! there are some men and women, full of the power of the gospel, who cannot rest satisfied till they have opened their very hearts, and given the poor wayfaring men the only thing which is really their own,—themselves, their faith, their energy, their hope of God.—Phillips Brooks.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Vacant Lot Garden Club

With a membership of 1,125, the Calgary Vacant Lots Garden Club last season used 2,500 city lots for the cultivation of vegetables and flowers, seeded ten acres back to grass and summerfallowed 25 lots, according to the report of the secretary presented at the 17th annual meeting of the club. Revenue amounted to \$2,035 and expenditure to \$2,587.

CHRISTMAS IN BED

If you were to search Alberta over,
the place you would find the Happiest
Christmas is spent, might be found in
the Junior Red Cross Unit of the Uni-
versity Hospital in Edmonton where
the little patients awaited the coming
of Santa in their beds.

For weeks the talk had been about
the great day when the toys would re-
present the hearts desire of many a
crippled boy and girl. Like all good
things it came at last, and no less a
visitor than His Honor the Lieutenant
Governor was present at the Happy
gathering.

Thanks to a group of young men of
the Kinsmen Club, the sick children of
Alberta are given a right royal time
every year at Christmas.

Both in Calgary and Edmonton there
is their service of love to those less
fortunate, and the joy of distributing
the good cheer is something that is not
easily forgotten as young eyes sparkle
and childish voices whisper their
thanks.

In the Red Cross headquarters, Santa
has a special Headquarters of his own.
Warm quilts, the work of many a dis-
tant listener in are being shipped off
to those who are in needy circumstan-
ces. The odd toy and book and game
are included with a bag of candy or
a doll to please the little girl. As one
said who has seen such parcels deliv-
ered where suffering was acute, "They
surely are like a real "Godsend."

Thus the quiet work of individual-
ised mercy flows on in the channels of
Red Cross, made possible by the gen-
erosity of tried and true friends, who
in days of war were workers and whose
strength has not diminished for the
many and varied works of service in
times of peace.

COMMUNICATION

To the Editor,
Carbon Chronicle.

Dear Sir:

I take this opportunity to enlighten
the minds of the people of Carbon,
who are so interested in my affairs.
For quite a long time I have been
openly discussed by the people of Car-
bon regarding my matrimonial affairs.
When I do get married, if I can find
a young lady who is willing to marry
such a disreputable young man as my-
self, I will most certainly publish it
in both the Calgary and Carbon papers,
so till then, kindly set your minds at
rest and find someone else to talk
about.
